Deleting Tabs

New Content Deletion Warnings (and Extra Step)

When deleting content from the Course Menu (Tabs), the confirmation message and process has changed. In the past, you only needed to click OK once to confirm a deletion. Now, Blackboard asks for additional confirmation.

To delete a content area, tool, or other item from the Course Menu:

1. Click the Action Link button for the Course Menu item.
2. Click Delete.
3. Click Delete Content.
4. Click Delete, to permanently delete the item.

Blackboard Learn does not ask for extra confirmation when deleting content from within the content areas or learning modules.

To rename, hide, or delete a Course Menu Link

- Click on the Action link drop down.
- Select Hide Link to make it unavailable to students.
- Click Show Link to make it available to students.
