APA Style Citations

Scholarly Article from a Database

**BASIC FORMAT:**

**EXAMPLE ONE:**

List authors by their last name, followed by their first initials.

More than one author: separate each name with a comma and put an ampersand before the final author.

More than seven authors: put an ellipsis after the sixth author, then list the final author.

**EXAMPLE TWO:**

When a DOI is available, put it at the very end of the citation.

Capitalize the journal title as it appears in the source.

- Cite articles from databases just like print articles.
- When a DOI (digital object identifier) is available, add it to the end of the citation.
- When there is no DOI, put “Retrieved from” and then the permalink of the article.
- You don’t have to include the name of the database unless your professor wants you to.
Use the publication information provided to write a citation for this journal article.

Hint: There was no DOI assigned to this article.

The Impact of Counseling on the Self-Esteem of Women in Thailand Who Have Experienced Intimate Partner Violence.
